## **GAS PRODUCTS FOR SPECIAL APPLICATIONS**

## **GAS MIXTURES FOR WINDOW INSULATION**

Rare gases and rare gas mixtures are widely used in worldwide window industry. These gases incorporated into the glass windows and doors to increase their insulation value.

25% Argon Balance Krypton	049 044 016	5.7 m³ 4.3 m³ 1.7 m³	1680 1420 1570	580
10% Oxygen Balance Krypton	049 044 016	5.7 m³ 4.3 m³ 1.7 m³	1650 1400 1550	590
10% Oxygen, 20% to 50% Krypton Balance Argon	049 044 016	volume vary per gas mixture	pressures vary per gas mixture	590
10% to 50% Xenon Balance Krypton	049 044 016	volume vary per gas mixture	pressures vary per gas mixture	580

## **GAS MIXTURES FOR PLASMA DISPLAY PANELS**

In monochrome Plasma Display Panels (PDP's), a rare gas mixture, usually with a neon component, can be used to create a red-orange luminescence. The creation of green, blue, yellow or red luminescence is achieved through various proprietary combinations of rare and inert gas components and their interacting phosphors.
